

JL125-9 Motorcycle

The JL125-9 motorcycle features a windshield and side storage compartments. It is equipped with a standard headlight and taillight configuration.

Overview

JL125-9 Utility Motorcycle

The JL125-9 is a specialized utility motorcycle designed for compact and maneuverable transport. It features a robust steel frame and alloy wheels, making it suitable for demanding environments such as apparel and textile machinery facilities. Equipped with practical additions like a windshield, side storage compartments, and a rear-mounted vertical pole, it provides a functional solution for internal logistics and transport needs.
