Product Overview

High-Precision SMT Nozzle Series

This range of high-precision nozzles is engineered for reliable and accurate component placement in Surface Mount Technology pick and place machines. Designed for both original and high-quality replacement applications, these components ensure consistent vacuum seals and secure handling during PCB assembly. Their durable construction is built to withstand high-speed and high-volume production environments, providing seamless integration and optimal performance.

Compatibility

Supported Nozzle Assemblies

- 101 / 101 CVS
- 102 / 102 CVS
- 103 / 103 CVS
- 104
- 105
- 106
- 201
- 202
- 203
- 204
- 500 / 500 CVS
- 501
- 502 / 502 CVS
- 503 / 503 CVS
- 504 / 504 CVS
- 505 / 505 CVS
- 506
- 507
- 508
- 509
- 510-529
- 536-537
- 579-581
- 591-595
- 700-701
