

JUKI SMT Pick and Place Nozzle

This pick and place nozzle is designed for JUKI SMT machines. It ensures accurate component placement during high-speed electronic assembly processes.

Product Overview

High-Precision SMT Nozzles

These professional-grade SMT pick and place nozzle assemblies are engineered for high-speed, reliable component handling in automated assembly lines. Available in both original and compatible replacement versions, these nozzles ensure precise placement and secure component grip to minimize downtime. They are designed to integrate seamlessly into diverse SMT production environments.

Compatibility

Supported Nozzle Models

- 100 Series (101-106)
- 200 Series (201-204)
- 500 Series (500-537)
- 500 CVS Series
- 579-595 Series
- 700 Series (700-701)
