

Kayak and SUP Carrier System

This versatile system is designed to transport kayaks and stand-up paddleboards (SUPs) on a vehicle's roof rack. The kit includes J-cradles, extensions, and straps to accommodate various kayak sizes and SUPs, and it can be configured to carry one or two kayaks, oversized kayaks, or a single SUP.

Overview

Versatile Transport Solution

This 4-in-1 carrier system is engineered for maximum versatility, allowing for the secure transport of kayaks and stand-up paddleboards on a vehicle's roof rack. The system features a folding J-cradle design with extensions, providing the flexibility to carry one or two kayaks, oversized kayaks, or a single SUP. With its universal fit and comprehensive included hardware, it offers a complete, ready-to-use solution for professional transport needs.
