

Kerosene Space Heater

This kerosene space heater provides warmth in indoor spaces. It features a cylindrical design with a protective metal cage around the heating element.

Product Overview

Efficient Kerosene Space Heating

This kerosene space heater provides a reliable and portable heating solution, ideal for indoor environments. Featuring a robust cylindrical design with an integrated protective metal cage, it ensures both safety and effective heat distribution. The unit is designed for simple operation and provides a consistent, warm output suitable for various professional or residential spaces.

Key Performance Metrics

Heating Performance

3450 kcal/h

Heat Output Capacity

Design and Build

Safety Design

- Protective metal safety cage
- Cylindrical housing
- Visible heating element operation

Available Color Options
