

# Keyless Entry and Remote Start System with GPS Tracking

This keyless entry and remote start system allows users to start and stop their vehicle with a button press. It includes GPS tracking for real-time location data and vehicle status updates via a smartphone app.

## Product Overview

### Advanced Vehicle Control & Tracking

This comprehensive vehicle security and convenience system integrates keyless entry, remote engine start/stop, and real-time GPS tracking into one unit. Designed for modern vehicle management, it allows users to control essential functions directly from a smartphone application. The system enhances security with features like geo-fencing and anti-theft alerts, while improving daily convenience through remote engine operations.

## Key Features

### Core Functions

- GPS Vehicle Tracking
- Remote Engine Start
- Remote Engine Stop
- App-based Lock/Unlock
- App-based Start/Stop

## Security & Alerts

### Security Features

Geo-fence Security, Anti-theft Security, Emergency Fueling Reminder, Low Battery Voltage Reminder, Speeding Reminder

## System Components

### Included Components

- Start/Stop Button
- Control Module
- GPS Antenna
- Wiring Harness
- Installation Cables

## Technical Specifications

### Model Identifier

NT-G10
