Product Overview

High-Efficiency Kitchen Appliance Wash Pump

This wash pump is specifically engineered for efficient and reliable water circulation in modern dishwasher units. Designed for the global market, it features a compact, durable construction that allows for easy integration into various appliance models. The unit ensures optimal cleaning performance by maintaining consistent water flow throughout the dishwashing cycle.

Technical Details

Design Features

- Compact form factor
- Durable plastic material construction
- Internal vane design for efficient water flow
- Ribbed side outlet for secure connection

Component Category	Wash Pump
Model Number	ZWBL15-A
Primary Application	Dishwashers, Kitchen Appliances
