

Kitchen Exhaust Ventilation Hood with Filtration

This kitchen exhaust hood mounts above stoves and cooktops to extract airborne grease, smoke, and odors. It incorporates a filtration system and adjustable fan speeds for effective air purification.

Product Overview

Professional Kitchen Ventilation Solution

This kitchen exhaust ventilation hood is engineered to maintain air quality in demanding culinary environments by effectively extracting smoke, grease, and odors. Featuring a durable metallic finish with a modern design, it integrates seamlessly into professional kitchen setups. The unit includes a high-efficiency filtration system and adjustable fan settings, ensuring optimal performance and a cleaner workspace.

Technical Specifications

Material Finish	Stainless steel metallic finish with blue accent
Venting Style	Chimney-style external exhaust
Control Interface	Front-mounted push-button controls

Key Features

Core Benefits

- Advanced grease and smoke filtration
- Adjustable fan speed settings
- Professional-grade extraction power
- Sleek chimney-style design

Best For	Commercial Kitchens, Restaurant Ventilation, Catering Facilities
