

# Kitchen Range Hood with Twin Turbine System

This kitchen range hood features a twin turbine smoke cage for efficient smoke and odor removal. Its under-cabinet design and double suction technology ensure a clean and comfortable cooking environment.

## Product Overview

### Professional Twin Turbine Ventilation

This high-performance kitchen range hood features a sophisticated twin turbine system designed for powerful, double-core suction. Utilizing 360° fume separation technology, it ensures efficient smoke removal while protecting internal components for an extended machine lifespan. The modern aesthetic is achieved through a durable combination of black tempered glass and high-quality stainless steel, controlled by an intuitive touch-sensitive interface.

## Design and Build

Construction Materials	Tempered Glass, Stainless Steel
Control System	Touch induction computer switch

## Dimensions

Main Unit Dimensions	880 x 385 x 945 mm
Panel Size	410 x 310 x 380 mm

## Performance Features

### Suction Technology

- Twin turbo smoke cage
- Double suction system
- 360° fume separation technology

Motor	Full closed double ball copper motor
Turbine Operation	Yes
