

Kitchen Ventilation Hood

This kitchen ventilation hood is designed to remove smoke, grease, and odors from the cooking area. It features a rectangular housing, a control panel with multiple buttons, and built-in lighting.

Product Overview

Professional Kitchen Ventilation

This kitchen range hood is engineered to maintain a clean cooking environment by effectively removing smoke, grease, and odors. Featuring a durable rectangular housing and a user-friendly control panel, it provides reliable performance for high-traffic cooking areas. Integrated lighting ensures optimal visibility, while the robust filter system simplifies maintenance for consistent air quality.

Technical Specifications

Model Identification	CDL-358
Key Design Elements	Rectangular Housing, Multi-button Control Panel, Integrated Lighting, Built-in Filter System
Primary Use	Stovetop ventilation and air filtration
