

Kitchen Ventilation Hood with Filtration

This range hood features a filtration system and fan to remove smoke and grease. The unit includes a control panel and easily accessible filter for cleaning.

Product Overview

Professional Kitchen Ventilation Solution

This high-performance kitchen ventilation hood is engineered to maintain clean air quality in professional food preparation environments. Featuring an advanced integrated filtration system, it effectively captures smoke, grease, and airborne particulate matter. The unit is designed for durability and ease of maintenance, with an intuitive control interface that allows operators to manage ventilation power with precision.

Technical Specifications

Maintenance

- Easily accessible filter housing
- Simplified filter replacement process
- Designed for efficient grease removal

Filtration System

Smoke Extraction, Grease Filtration, Airborne Particle Removal

Control System

Operational Controls

Multi-function Control Panel • Operational Indicator Lights • Adjustable Ventilation Settings
