

Kitchen Ventilation Hood with Glass Canopy

This kitchen ventilation hood is designed to remove smoke and odors from the cooking area. It features a curved glass canopy, digital display, and integrated controls for fan speed and lighting.

Product Overview

Professional Kitchen Ventilation

This kitchen range hood features a sophisticated curved glass canopy design, perfectly blending aesthetics with high-performance smoke and odor removal. Constructed with a durable stainless steel body, it integrates seamlessly into modern kitchens to maintain air quality by effectively capturing airborne grease and particles. The intuitive digital display and integrated controls allow for precise management of fan speeds and lighting, providing a reliable solution for any culinary environment.

Technical Specifications

Primary Functions

- Smoke extraction
- Grease filtration
- Odor removal
- Adjustable fan speed

Body Material	Stainless Steel
Design Features	Curved Glass Canopy, Digital Display, Integrated Lighting

Compliance and Usage

Best For

Residential Kitchens
