

Kitchen Ventilation Hood with Integrated Lighting

This kitchen range hood is designed to remove smoke, grease, and odors from the cooking area. It features a ventilation system, integrated lighting, and a filter system, with a stainless steel finish for durability and easy cleaning.

Product Overview

Professional Kitchen Ventilation Solution

This high-performance kitchen range hood is engineered to maintain a clean and odor-free environment by efficiently removing smoke, grease, and airborne particles. Built with a durable stainless steel finish, it offers both longevity and ease of maintenance in demanding kitchen settings. The unit includes integrated lighting and versatile speed settings to ensure optimal air quality and visibility during food preparation.

Technical Specifications

Primary Purpose

- Smoke extraction
- Grease particle trapping
- Odor removal

Material	Stainless steel
Installation Style	Wall-mounted
Core Features	Integrated Lighting, Multi-speed Ventilation, Grease Filtration System
