

Kitchen Ventilation Range Hood

This range hood is designed for kitchen ventilation. It features a multi-speed fan, integrated lighting, and a grease filter system.

Product Overview

Professional Kitchen Ventilation

This stainless steel range hood is engineered for high-performance kitchen ventilation in professional or commercial-grade residential settings. It effectively removes smoke, odors, and grease particles through a reliable ducted system and advanced grease filtration. Designed for ease of use, the unit features an intuitive control panel for adjusting lighting and multi-speed airflow to suit any cooking intensity.

Technical Specifications
