

Kitchen Ventilation Range Hood

This range hood is designed to eliminate smoke, grease, and odors in the kitchen. It features a powerful ventilation system, LED lighting, and easy-to-use controls.

Overview

Professional Kitchen Ventilation

This 900mm range hood provides high-performance smoke and odor extraction, making it an essential addition to any professional or modern kitchen environment. It features a reliable copper motor paired with a robust metal blower box for consistent airflow and durability. Designed with user convenience in mind, the unit offers intuitive controls, energy-efficient LED lighting, and an efficient air pressure system to maintain a clean cooking workspace.

Performance Metrics

Suction Power

850 M3H

Airflow

310 Pa

Air Pressure

Technical Specifications

Power Supply	220-240V/50Hz
Input Power	180 w
Noise Level	d56B
Motor Speeds	2

Design and Components

Lighting	2 x 1.5w LED
Unit Width	900 mm
Chimney Height	450 mm
Build Materials	Copper motor, Metal blower box
Control Type	Push button
