

Kitchen Ventilation Range Hood

This range hood is designed for kitchen ventilation. It features a filtration and exhaust system to remove smoke, grease, and odors produced during cooking.

Product Overview

Professional Kitchen Ventilation Solution

This high-performance kitchen range hood is engineered to maintain optimal air quality in demanding culinary environments. Featuring an advanced integrated filtration and exhaust system, it effectively captures smoke, grease, and cooking odors at the source. Designed for professional installation directly above stoves or cooktops, this unit ensures a cleaner, safer workspace for your kitchen operations.

Technical Features

System Components

- Integrated filtration system
- High-capacity exhaust system
- Grease removal assembly
- Odor neutralization unit

Mounting Style

Over-stove wall or ceiling mount

Primary Applications

Commercial Kitchens, Grease Removal, Air Purification, Smoke Ventilation
