

Kitchen Ventilation Range Hood

This range hood is designed for household kitchen ventilation, effectively removing smoke, grease, and odors produced during cooking. It features a built-in light for illuminating the cooking surface and a multi-speed fan for adjustable ventilation power.

Product Overview

Professional Kitchen Ventilation

This range hood is engineered for efficient kitchen ventilation, effectively capturing and removing smoke, grease, and cooking odors. Designed for reliable performance, it features an integrated lighting system to illuminate the workspace and a multi-speed fan control for versatile extraction power. Its durable construction ensures longevity while maintaining a focus on user-friendly installation and simple maintenance requirements.

Technical Specifications

Integrated Lighting	Yes
Fan Speed Settings	Multi-speed adjustable
Key Capabilities	Smoke Removal, Grease Filtration, Odor Control, Surface Illumination

Design and Build

Maintenance

Easy Installation • Low Maintenance

Build Material	Durable high-grade materials
