Product Overview

High-Efficiency Kitchen Ventilation

This advanced range hood utilizes innovative smart rotation oil-collecting technology to ensure complete fume extraction. Engineered with a powerful DC motor and high wind pressure, it provides superior air purification for demanding professional kitchen environments. The user-centric design includes multiple fan speeds, delay shutdown, and a tool-free disassembly system for streamlined maintenance.

Technical Performance

Wind Pressure

700 Pa

Wind Pressure

Fan Speed Levels

7

Design and Maintenance

Operational Functions

- Delay shutdown design
- In-line air duct for optimal discharge
- Intuitive control panel

Maintenance Capabilities

Convenient Disassembly, Smart Oil Collection, Tool-free Cleaning
