

Kitchen Ventilation Range Hood

This kitchen range hood is designed for installation above cooking surfaces to remove smoke, grease, and odors. It features integrated lighting and multiple control buttons for adjusting fan speed.

Product Overview

Professional Kitchen Ventilation

This high-performance range hood is engineered for seamless installation above professional and residential cooking surfaces. It effectively extracts smoke, airborne grease, and cooking odors to maintain optimal air quality within the culinary environment. The unit features a durable metallic finish, integrated illumination for enhanced visibility, and intuitive controls to manage extraction intensity.
