Overview

High-Capacity Kitchen Waste Solution

This specialized kitchen waste collection truck is engineered for efficient and hygienic waste management in urban environments. Featuring a high-capacity 8.5 cubic meter tank, it offers a harmonious and robust design suitable for municipal sanitation, restaurants, and food processing facilities. The system is built for simplicity, reliability, and environmental compliance, ensuring low operating costs and minimal maintenance requirements.

Technical Specifications

Tank Capacity	8.5 m ³
Key Features	Sealed Container, Hydraulic Lifting System, Corrosion-Resistant Tank, Automatic Compression

Operational Benefits

Operational Advantages

- Simple and efficient operation
- Environmental friendly (no secondary pollution)
- Reliable quality with low failure rate
- Easy maintenance
- Low operating costs

Applications

Suitable Environments

Municipal Sanitation • Urban Streets • Factories & Mining • Residential Districts • Commercial Food Processing
