

KN95 Non-Medical Particulate Respirator

This respirator complies with standard GB2626-2006. It is suitable for protection against air pollution during daily activities.

Overview

High-Efficiency Protection

This KN95 particulate respirator is engineered to provide effective respiratory protection against airborne particles. Designed for non-medical use, it features a 5-layer filtration system to ensure both high filtration efficiency and improved breathability. The mask is constructed with high-quality materials, including a secure aluminum nose clip and comfortable thermoplastic elastomer straps for a reliable seal.

Compliance & Standards
