

Knapsack Mist Duster 3WF-30

This knapsack mist duster is a portable and efficient solution for agricultural spraying and dusting. It is designed for comfortable use and optimal performance, with adjustable settings for controlling the spray volume and distance.

Product Overview

Professional Knapsack Mist Duster

The 3WF-30 is a high-performance agricultural tool designed for efficient liquid and powder dispersion. Featuring a modern, patented construction, it utilizes a combination of airflow and pressure for precision application. Its lightweight design and ergonomic structure make it comfortable for extended field use while ensuring anti-corrosion durability.

Technical Features

Application Methods

- Dusting via airflow
- Liquid spraying via pressure

Materials

Plastic, Light Aluminum Alloy

Performance Benefits

Operational Efficiency

100 %

Coverage Efficiency

Chemical Conservation

Yes

Design and Ergonomics

Ergonomics

- Lightweight design
- Anti-corrosion build
- Comfortable carrying system
