Product Overview

Premium Microfiber Cleanroom Wiping Solutions

These soft-texture microfiber wipes are engineered from a high-performance blend of 70% polyester and 30% nylon, designed for critical cleaning environments. The dense interlock knit construction utilizes the lipophilic property of polyester and hydrophilic property of nylon to deliver superior water absorbency and wiping efficiency. Manufactured to meet Class 10 (ISO 4) standards, these wipers effectively capture particles without scratching sensitive surfaces, making them ideal for electronics, pharmaceuticals, and precision component assembly.

Material and Construction

Composition	70% Polyester, 30% Nylon
Edge Treatment	Laser/ultrasonic sealed edges

Performance Standards

Cleanroom Rating	Class 10 • ISO 4
Quality Compliance	ISO 9001, ISO 14001
Cleaning Process	Laundered with 18 MΩ pure water

Ordering and Packaging

Available Sizes and Packaging

Dimensions	Pieces/Bag	Bags/Carton
9"x9"	100	20
6"x6"	100	20
4"x4"	400	40

Packaging Type	Double chamber vacuum packaging
