## Product Overview

### Korean Standard Electrical Solutions

These electrical switches and sockets are engineered specifically for Korean electrical standards, offering reliable performance for both residential and commercial installations. Constructed from high-quality PC material with durable copper and silver contacts, they ensure long-term safety and operational efficiency. The range includes versatile configurations such as single and double sockets as well as standard light switches.

## Technical Specifications

Switch Operational Life	80000 cycles
Socket Operational Life	15000 cycles
Rated Current	16 A
Rated Voltage	250 V

## Materials & Construction

Housing Material	Polycarbonate (PC)
Contact Materials	Copper, Silver

## Features

### Safety Features

- Safety shutters on sockets
- Flush mounting design
- Durable thermoplastic construction
