

Kraft Board Production Machine with Multi-Wire System

This multi-wire machine is designed for producing kraft board. It features multiple rollers, tensioning systems, advanced control panels, and pneumatic systems for precise operation in high-volume environments.

Overview

High-Performance Kraft Board Production

This industrial-grade multi-wire machine is engineered for the efficient, high-volume production of kraft board. Featuring a robust design, it incorporates advanced wire and pressing sections to ensure consistent sheet formation and effective water removal. Designed for continuous operation, this system provides the reliability and precision required for demanding manufacturing environments.

Technical Specifications

Operating Speed

500 mpm
Operating Speed

Maximum Deckel Width	5600 mm
Basis Weight Range	150 - 300 gsm
