Product Overview

High-Performance Ku Band Antenna

The Ku Band 60cm Satellite Dish Antenna is a robust, high-performance solution engineered for reliable satellite signal reception and transmission. Featuring a precision-engineered 60cm parabolic reflector, it delivers excellent signal gain and directivity for clear communication. Designed with versatility in mind, this antenna supports both ground and wall mounting, making it suitable for a wide range of residential and commercial installations.

Technical Specifications

Reflector Diameter	60 cm
Frequency Band	Ku Band

Installation & Design

Mounting Type	Ground Mount, Wall Mount
Weather Resistance	Yes

Applications

Primary Applications

- Satellite TV Reception
- Data Transmission
- Satellite Internet Access
