

Ku Band LNB Feed Horn

This Ku band LNB feed horn is designed for satellite dish antennas. Its circular corrugated design optimizes signal reception and minimizes interference.

Product Overview

Professional Ku Band LNB Feed Horn

This Ku band LNB feed horn is engineered to enhance signal reception for satellite dish antennas. Its advanced circular corrugated design works to minimize interference and optimize signal clarity for reliable performance. Built with durable, weather-resistant materials, it offers long-term reliability and easy installation on a wide range of satellite equipment.

Technical Specifications

Frequency Band	Ku Band
Output Connector	Standard F-connector
Design Features	Circular Corrugated, Weather-resistant, Enhanced Reception

Installation and Compatibility

System Compatibility

- Standard Satellite Dishes
- Most LNB models

Mounting Hardware	Yes
