Product Overview

Professional Ku-Band Octo LNB

This high-performance Ku-Band Octo LNB is designed for robust satellite signal reception, supporting both HD and UHD (4K) broadcasts. It features eight independent outputs, making it an ideal solution for multi-room distribution or complex satellite setups. Engineered with a low noise figure and high frequency stability, it ensures excellent signal clarity even in challenging weather conditions.

Technical Specifications

Low Band Input Frequency	10.7 GHz
High Band Input Frequency	12.75 GHz
Low Band L.O. Frequency	9.75 GHz
High Band L.O. Frequency	10.6 GHz

Key Features

Core Features

- DVB-S2 (HD and UHD) compliant
- Eight outputs for multi-receiver connectivity
- Low power consumption
- Extremely heat and cold resistant
- UV-resistant weather protection housing
- Includes custom-fit weather protection cap

Certifications & Compatibility

Compliance

CE, UHD 4K, DVB-S2
