

Ku Band Satellite Dish Antenna

This satellite dish antenna is designed for receiving and transmitting signals in the Ku band. It features a robust construction for outdoor use and a precision-engineered reflector for optimal signal gain.

Product Overview

Professional Ku Band Antenna System

This satellite dish antenna is engineered for high-performance signal reception and transmission within the Ku band frequency range. Designed for durability in outdoor environments, it features a precision-engineered reflector that ensures optimal signal gain for satellite communication, broadcasting, and data transmission. The included mounting bracket facilitates secure and straightforward installation on both walls and poles.

Technical Specifications

Mounting Options

- Wall mount
- Pole mount

Construction

Robust Outdoor Design • Precision-Engineered Reflector

Frequency Band

Ku Band

Supported Applications

Satellite Communication, Broadcasting, Data Transmission

Model Identifier

CXC-D602
