

KY70D Hydraulic Excavator

The KY70D Excavator is a robust construction machine designed for digging, lifting, and material handling tasks. Featuring a powerful hydraulic system, it delivers efficient performance in various terrains.

Overview

KY70D Hydraulic Excavator

The KY70D is a versatile and robust hydraulic excavator engineered for high-performance digging and material handling. It features a powerful, reliable engine paired with an imported hydraulic system to ensure consistent digging force across various terrains. Designed with operator comfort and maintenance efficiency in mind, this machine includes an ergonomic cabin, suspension seating, and easy-access maintenance points.

Performance & Hydraulics

Operational Metrics

70 Class

Model Series

Hydraulic System

Imported World-Brand System, High Reliability, Strong Digging Force

Cabin & Operator Comfort

Operator Environment

- Suspension seat with weight adjustment
- Ergonomic cab design
- Wide visibility
- Color LCD monitor for real-time data

Maintenance & Convenience

Maintenance Features

- Fully open engine hood
- Automatic oil-filling pump
