

L-Type Film Cutting and Sealing Machine

The L-type cutting and sealing machine is designed for efficient and precise packaging. It features a robust construction with a sealing frame, a film roller system, and a control panel for adjusting sealing parameters.

Overview

Efficient L-Type Packaging Solution

The L-Type Film Cutting and Sealing Machine is designed for efficient and precise packaging operations. Featuring a robust construction with an integrated sealing frame and film roller system, it provides a clean and secure seal for products of various sizes. Its compact design and user-friendly interface make it an ideal choice for small to medium-scale production environments.

Technical Specifications

Model	380
Voltage	110V/220V
Frequency	50-60Hz
Machine ID	BT525H-H

Features

Control Panel Indicators	Power, Heating
