

Laboratory Drying Oven

This compact countertop oven is designed for laboratory and pharmaceutical use. Its stainless steel build ensures durability and easy cleaning.

Product Overview

Professional Laboratory Drying Oven

This compact countertop drying oven is engineered specifically for demanding laboratory and pharmaceutical environments. Constructed with high-grade stainless steel, it ensures exceptional durability and simplifies sanitation protocols. Equipped with a precise digital control panel, this unit provides accurate temperature and time management for consistent results in heating, drying, and sterilization processes.

Technical Specifications

Material	Stainless steel
Form Factor	Countertop
Control Interface	Digital control panel

Applications

Industry Suitability

Pharmaceutical • Laboratory

Primary Applications	Heating, Drying, Sterilization, Research and Development, Quality Control
