

Ladder Mobility Wheel

This heavy-duty ladder wheel is designed for smooth and easy ladder movement. It features a triangular steel frame with three durable rubber wheels, providing stability and maneuverability on various surfaces.

Product Overview

Heavy-Duty Mobility Solution

This heavy-duty ladder wheel is engineered for smooth and efficient movement, specifically designed to enhance the maneuverability of industrial ladders. Featuring a robust triangular steel frame equipped with three durable rubber wheels, this assembly ensures stability across various surfaces. It is an ideal solution for commercial environments where frequent ladder repositioning is required.

Technical Specifications

Frame Material	Steel
Wheel Material	Rubber
Wheel Configuration	Triangular 3-wheel assembly

Key Features

Core Features	Heavy-duty, Smooth movement, Industrial grade, Easy mounting
Mounting Mechanism	Central mounting hole with bolts and washers
