

Laminate Cutting Saw Blade

This circular saw blade is designed for cutting laminated panels. It features a steel body with carbide-tipped teeth for durability and clean cuts.

Product Overview

Professional Laminate Cutting Solution

This circular saw blade is engineered specifically for clean, chip-free cutting of laminated panels, significantly reducing the requirement for secondary edge processing. Built with a robust steel body and durable carbide-tipped teeth, it ensures longevity and consistent cutting performance. Integrated expansion slots help to minimize noise and vibration, providing a smoother and more stable operation in professional workshop environments.

Technical Specifications

Compatible Materials

- Laminated Panels

Compatible Machinery

- Table Saws
- Miter Saws

Material Composition

Steel Body, Carbide-Tipped Teeth

Key Features

Operational Advantages

Noise Reduction • Vibration Damping • Chip-Free Cutting
