

# Laminated Identification Card

This laminated identification card displays personal information and a photograph. The card features a complex, patterned background with concentric circles and fine lines.

## ADDITIONAL IMAGES

## Product Overview

### High-Security Identification Solutions

This laminated identification card serves as a secure, government-grade tool for verifying citizenship and personal identity. Engineered with advanced anti-counterfeiting technology and durable lamination, it ensures long-term reliability and data integrity. The card supports modern biometric integration, making it a robust solution for national identification programs and secure access control systems.

## Security Features

### Biometric Support

- Facial recognition
- Palm feature analysis
- Iris scanning
- Fingerprint recognition

### Anti-Counterfeiting Technologies

Anti-counterfeiting film, Multi-layer printing, Secure IC storage

## Technical Specifications

### Storage Technology

Integrated Circuit (IC)

### Industry Experience

**500 Million**

Units Supplied

### Card Type

Laminated Smart ID Card
