

# Lampholder

This lampholder is a lighting component designed for secure and efficient lamp mounting. Constructed from quality materials, it ensures durability and longevity in various lighting applications.

## ADDITIONAL IMAGES

## Product Overview

### Robust Lighting Component

This lampholder is a reliable lighting component designed for secure and efficient lamp mounting. Constructed from high-quality materials, it ensures durability and longevity in various lighting applications. Its design prioritizes safety and compliance with industry standards, providing a secure electrical connection for optimal performance.

## Technical Specifications

### Certifications & Markings

GS

### Internal Components

- Copper parts
- Aluminum lamp coil
- Spring mechanism

### Materials

Bakelite, Copper, Aluminum

### Voltage Rating

250 V

## Design & Application

### Key Features

- Heat resistant
- Threaded socket
- Easy installation

### Suitability

Residential, Commercial, Professional Electrician, DIY
