Overview

High-Performance Piston Engineering

This high-performance piston is specifically engineered for Lancer 2.0L 16V passenger car engines, focusing on optimal combustion and long-term durability. Constructed from high-strength aluminum alloy, it offers superior heat dissipation and wear resistance, making it an ideal choice for both stock engine maintenance and performance upgrades. The design features precision-machined ring grooves for efficient oil control and a lightweight profile to reduce reciprocating mass.

Technical Details

Suitable Applications

- Engine rebuilds
- Performance upgrades
- General maintenance
- Stock engines
- Modified engines

Engine Compatibility	Lancer 2.0L 16V
Material	High-strength aluminum alloy
Key Features	Precision-machined, Heat-resistant, Wear-resistant, Lightweight design
