

Laptop for Textile Machinery

This laptop is designed for use with textile machinery. Its compact design includes a full keyboard and touchpad, suitable for programming, data analysis, and design.

Product Overview

Industrial Precision Engineering

This silver-colored laptop is specifically designed to meet the rigorous demands of textile machinery operations. Featuring a robust, smooth metallic finish and a compact, high-efficiency form factor, it is optimized for onsite programming, technical data analysis, and intricate machine design. Its reliable build ensures consistent performance in professional manufacturing environments.

Technical Specifications

Input Interface

- Full-size keyboard
- Integrated precision touchpad

Design Finish	Metallic Silver
Form Factor	Compact Industrial Design

Compliance and Branding

Equipment Identifier

KZG
