

Large Capacity Bottle Blow Molding Machine

This high-speed automatic blow molding machine is designed for producing large-capacity plastic bottles. It utilizes advanced heating and molding technology to ensure consistent bottle quality and efficient production rates.

Product Overview

High-Efficiency Large Capacity Blow Molding

This automatic blow molding machine is specifically designed for the production of large-capacity plastic containers ranging from 3 to 7 liters. Utilizing advanced heating and molding technology, it ensures consistent quality for PET bottled water and edible oil packaging. The robust mechanical structure and precise control systems allow for reliable operation and seamless integration into existing production lines.

Performance Metrics

Production Efficiency

16800 BPH

Max Capacity

1200 BPH

Min Capacity

Technical Specifications

Material Compatibility

PET

Applicable Bottle Volume

3 - 7 Liters

Application Scope

Target Industries

- Bottled Drinking Water
- Edible Oil Production
- Beverage Manufacturing
- Liquid Food Packaging

System Features

Core Features

- Advanced heating and molding technology
- Precise control systems for minimal downtime
- Integrated conveyor system for automated handling
- Configurable molds for versatile production

Automation Level

High-speed automatic
