

Large Capacity Coffee Urn

This large capacity coffee urn is designed for brewing and dispensing coffee in bulk. It features a stainless steel body, a dispensing tap, and a temperature adjustment knob.

Overview

Professional Bulk Brewing Solution

This large capacity coffee urn is engineered for high-volume service environments, featuring a robust 100-cup capacity ideal for catering, offices, and events. Constructed with a durable double-wall stainless steel housing, it ensures excellent heat retention while maintaining a cool-touch exterior. The unit includes intuitive features like a water level gauge, dripless faucet, and precise temperature control, making it a reliable choice for consistent, efficient coffee service.
