Product Overview

Professional Grade Electric Kettle

This large-capacity electric kettle is engineered for efficiency and safety in professional or high-use environments. Featuring a durable double-walled construction with food-grade stainless steel, it ensures excellent thermal retention and a cool-to-touch exterior. Advanced safety features, including boil-dry protection and automatic power-off, provide reliable operation for busy kitchens.

Construction & Materials

Design Features

- Double-wall body structure
- 360-degree rotating separated base

Material Composition

304 Stainless Steel, 201 Stainless Steel, 410 Stainless Steel, Food-Grade Material, Polypropylene (PP)

Safety & Performance

Safety Features

Anti-dry burning • Automatic power-off • Water shortage protection

Thermostat System

Dual-chip thermostat system for precise temperature control
