Overview

Large Capacity Top Loading Solution

This top-loading washing machine is designed for high-volume laundry needs, featuring a large capacity drum ideal for bulky loads and heavy fabrics. It incorporates an intuitive electronic control panel with a digital LED display for seamless operation across various wash cycles. With advanced features like Fuzzy Logic and a specialized four-in-one detergent dispensing system, it ensures efficient cleaning performance for professional and domestic environments.

Key Features

Four-in-One Detergent Box

The integrated detergent box allows users to add liquid detergent, washing powder, softener, and bleach simultaneously. The system is engineered to dispense each agent in the correct sequence during the wash cycle for optimal fabric care.

Wash Programs

Available Wash Cycles

Quick Wash, Tub Clean, Synthetic, Jeans, Delicate, Heavy, Rinse, Spin, Water Soak

Control & Technology

Smart Technologies
