

Large Character Industrial Inkjet Printer

This inkjet printer is designed for industrial applications requiring durable and legible printing on various surfaces. It utilizes inkjet technology to apply text, codes, and graphics directly onto products or packaging as they move along a conveyor system.

Product Overview

Industrial Marking Solution

This large character inkjet printer is engineered for demanding industrial environments, providing a reliable method for marking and coding directly onto products or packaging on a conveyor system. It offers a cost-effective solution for businesses needing durable, legible text, codes, and graphics. With a user-friendly interface and adjustable settings for character size and resolution, it ensures precise product identification and traceability across various substrates.
