

Large Format Digital Printer

This high-precision printer is designed for large-format printing applications. It features multiple print heads and a robust media handling system for efficient, high-quality output.

Overview

Industrial Large Format Digital Printer

This high-precision digital printer is engineered for industrial-grade large-format printing applications. It incorporates multiple print heads to ensure efficient, high-quality output suitable for professional graphics, posters, and signage. The system features a robust media handling architecture and an intuitive control panel designed to streamline complex printing workflows.

Performance Metrics

Print Head Configuration	Multi-head array
Suitable Applications	Signage, Posters, Large-format Graphics

System Features

Control System	User-friendly digital control panel
Media Handling	Robust industrial media feed system
