

Large Format Material Cutting System

This large format cutting system is designed for precision cutting of various materials. It features multiple cutting heads for increased efficiency and versatility.

Overview

Professional Large Format Cutting Solution

The TK4S large format cutting system is engineered for versatile, high-precision processing across multiple industrial applications. Designed to handle complex tasks with ease, it supports full cutting, half cutting, engraving, creasing, grooving, and marking. This system combines robust construction with a user-friendly operating interface, ensuring high-throughput and reliable performance for demanding production environments.

Technical Capabilities

Design Features

- Large format processing area
- Multiple cutting head integration
- Advanced industrial control mechanism
- Organized cable management system
- User-friendly operating interface

Supported Processes

Full Cutting, Half Cutting, Engraving, Creasing, Grooving, Marking
