Product Overview

Precision Adjustment for Large Format Materials

This large format tile gap adjustment tool is engineered for the precise positioning and fine-tuning of heavy, smooth-surfaced materials. Featuring a robust steel rod construction and dual pump suction cups, it ensures secure adhesion and stability during installation. The tool is highly versatile, suitable for ceramics, slabs, stone, granite, plastic, metal, and glass, making it an essential asset for achieving consistent grout lines and professional finishes.

Technical Specifications

Horizontal Gap Adjustment	40 mm
Vertical Gap Adjustment	20 mm
Suction Mechanism	Pump Suction Cup
Compatible Materials	Ceramics, Slab, Stone, Granite, Plastic, Metal, Glass

Usage Guidelines

Recommended Usage	Use two adjusters together for tiles larger than 1.8m
