

Large Format Tile Inkjet Printer

This large format inkjet printer is suitable for ceramic tile digital printing applications. The industrial printing equipment utilizes advanced inkjet technology to deliver exceptional print quality on various tile sizes.

Large tile printer

Overview

Industrial Large Format Tile Printing

This advanced large format inkjet printer is engineered for high-volume ceramic tile production, featuring 16-level grayscale processing for exceptional delicacy and balance. The system integrates independent CPU-controlled printheads and a high-flow, closed-loop ink circulation system to ensure consistent quality across both light and dark color applications. Designed for reliability and precision, it offers optimized HMI controls and advanced compensation functions to prevent line defects during continuous operation.

Print Performance

Ink Drop Size Range

13 pl

Smallest Drop

133 pl

Largest Drop

Printing Width

108 mm

Selectable Drive Waveforms

Fine, Standard, High Volume, Super High Ink Volume

Ink System

Ink Circulation Features

- Closed-loop flow rate control
- Water bath heating system
- High-flow internal circulation
- 35% higher stability than previous generation

Internal Ink Circulation Flow

130 ml/min

Technical Specifications

Grayscale Processing	16 levels
Glaze/Cover Ink Capacity	45 g/sqm
Ink Density	1300 g/cm ³

System Features

Control System

- Independent CPU per printhead
- Exclusive 4G memory per printhead
- Injector blockage compensation
- Advanced HMI evolution
