Overview

Professional Tile Handling Solution

This large format tile transport system is engineered for the safe and efficient handling of oversized materials, including tiles, slabs, marble, and glass. Featuring a robust aluminum profile, the modular design allows for adjustable suction cup positioning to accommodate various tile dimensions up to 3.2 x 1.6 meters. Designed for professional installers, it includes ergonomic handles and a secure vacuum system to minimize the risk of damage during transport and laying.

Technical Specifications

Maximum Load Capacity	180 kg
Maximum Tile Size	3.2 x 1.6 meters

Suction System

Suction Cup Configuration

- 6 x Pump suction cups
- 2 x Aluminium suction cups

Individual Cup Capacity

120 kg

Aluminium Cup

40 kg

Pump Cup

Features

Key Features	Adjustable Profile, Extension Handle, Carrier Handle, Modular Design, Vacuum Gauge Option
