

Large Format UV-R Flatbed Printer

This large format UV-R flatbed printer is designed for high-resolution printing on rigid and flexible media. It utilizes a UV curing system and precision motion control to produce vibrant and durable prints for applications like signage, displays, and industrial products.

Overview

High-Performance UV-R Printing Solution

This large format UV-R flatbed printer is engineered for high-resolution printing on both rigid and flexible media. It features a robust frame construction and precision motion control to ensure consistent, professional-grade output. Designed for demanding production environments, this system supports various ink types and media thicknesses, making it an ideal choice for signage, displays, and industrial applications.

Technical Capabilities

Printing Technology	UV-R Flatbed
Media Compatibility	Rigid Media, Flexible Media

Key Features

System Features

- Robust frame construction
- Precision motion control system
- Integrated UV curing system
- User-friendly control interface

Applications

Primary Applications

Signage • Displays • Industrial Products
