

# Large Hydraulic Excavator

This large hydraulic excavator is designed for heavy-duty excavation and construction tasks. It offers a robust hydraulic system, powerful engine, and durable construction for reliable performance in demanding environments.

## Product Overview

### High-Performance Hydraulic Excavator

This large hydraulic excavator is engineered for heavy-duty construction and mining applications, offering a balance of power and efficiency. Equipped with a turbocharged engine and advanced air-air intercooling, it delivers strong, reliable performance while maintaining low noise levels and high fuel economy. The negative flow control system ensures exceptional system stability and precise operation for demanding project requirements.

## Engine and Performance

Engine Type	Cummins QSM11
Engine Technology	Turbocharged, Air-air Intercooler

## Hydraulic System

Control System Type	Negative flow control
---------------------	-----------------------

## Key Features

### Operational Advantages

- High system stability
- Excellent operationability
- Low noise emissions
- High fuel economy

## Applications

### Suitable Applications

Mining • Infrastructure Development • Large-scale Construction
